## ... and so is BioMax

■ BioMax is making inroads into the Australian trucking scene, selling biodiesel to companies trying to reduce their environmental footprint and improve their bottom line. BioMax biodiesel is made from animal fats, canola oil and used cooking oil and meets all fuel standards. "The benefits of biodiesel are not limited to reduced greenhouse gas emission. It also reduces particulate matter, carbon monoxide and sulphur dioxide," says Peter Edwards, managing director of the Victor Smorgon Group, BioMax's parent company.
